THIS 2017 NATIONAL COHOUSING CONFERENCE promises an amazing lineup of offerings, from innovative approaches to developing new and affordable communities, to potent ways to enhance our vibrant communities.

WE WILL COVER cohousing basics as well as hot topics in sustainability and resiliency in both living green through energy efficiency, shared resources, and greener building, to how community sustains us for measurably healthier lifestyles.

BUILDING RESILIENT, SUSTAINABLE COMMUNITIES
• Advocating that cohousing play a key role in addressing today’s environmental, economic and social challenges
• Building camaraderie and nurturing passion
• Sharing enhanced models for established communities
• Generating interest/excitement among developers and public officials
• Cohousing as a model for other types of communities
• Expanding recognition/appreciation of cohousing benefits

SINCE THE FIRST American cohousing communities were completed in the early 1990’s, more than 160 communities have been built, with more than 130 in process. Small and large, urban and rural, newly built and retrofits, these communities have consistently been at the forefront of creating environmentally and socially sustainable neighborhoods.
